

## Features

- designed for OKTO DAC8
- additional galvanically isolated 5V voltage for any input / DSP module (like MiniSHARC or NanoSHARC by MiniDSP)
- low radiation Talema transformers, Schottky rectifiers to avoid diode switching noise
- 4x 10 000  $\mu\text{F}$  of filtration capacitance
- selectable mains voltage 120V / 230V
- short-circuit protected
- outputs
  - 15V, 0.5A
  - 15V, 0.5A
  - 5V, 1A
  - 5V, 1A
